The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

M

DETAILED ACTION

Claims 1-20 are pending and have been examined.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05 April 2005 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 9, 17 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 9, 17 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps pertain to the relationship of the authentication flag to the updating method.

Application/Control Number: 09/698,526

Art Unit: 2193

Claim Rejections - 35 USC § 102

Page 3

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 2-3, 5-6, 10-11, 13-14, 18 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by **Shaw** (USPN 6,381,741).

<u>Claim 2</u>

Shaw disclosed a method for configuration management for a computing device (*Abstract*), comprising:

providing available software to be loaded into said computing device to said computing device through an interface (Figure 1, elements 50 and 70; column 2, lines 58-67; column 1, line 65 to column 2, line 10);

Application/Control Number: 09/698,526 Page 4

Art Unit: 2193

 determining whether or not resident software stored in a storage device associated with said computing device is authenticated (column 3, lines 40-65; Figure 2);

- determining whether or not said available software is authenticated (column 4, line 6 to column 7, line 46);
- rejecting said available software if said resident software is authenticated and said available software is not authenticated (column 3, line 66 to column 4, line 3; column 5, lines 34-41); and
- updating said resident software with said available software if one of the following three conditions is met:
 - o (1) said resident software is authenticated and said available software is authenticated (column 3, line 58-65; Figure 2; forced update).
 - (2) said resident software and said available software are not authenticated (at least above condition 1 met),
 - o (3) said resident software is not authenticated but said available software is authenticated (at least above condition 1 met).

Claim 3

Shaw disclosed the method of claim 2 (as discussed above) wherein said determining whether or not said resident software is authenticated comprises:

 determining whether or not an authentication flag has been set (column 3, lines 45-57); Application/Control Number: 09/698,526

Art Unit: 2193

wherein said resident software is determined to be authenticated if said

authentication flag has been set (column 3, lines 48-50); otherwise

• said resident software is determined to be unauthenticated (column 3, lines

Page 5

48-50).

<u>Claim 5</u>

Shaw disclosed the method of claim 3 wherein said authentication flag is set by a

service technician (column 3, lines 55-65).

Claim 6

Shaw disclosed the method of claim 2 wherein said determining whether or not said

resident software is authenticated comprises of performing a direct authentication

procedure on said resident software (column 3, line 66 to column 4, line 5).

Claims 10-11 and 13-14

Apparatus claims 10-11 and 13-14 correspond to method claims 2-3 and 5-6 and as

such are rejected in the same manner.

Claims 18 and 20

Claims 18 and 20 correspond to claim 2 and as such are rejected in the same manner.

Claim Rejections - 35 USC § 103

Application/Control Number: 09/698,526 Page 6

Art Unit: 2193

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1, 4, 9, 12, 17 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Shaw** (USPN 6,381,741).

Claim 1

Shaw disclosed a method for configuration management for a computing device (*Abstract*), comprising:

- providing available software to be loaded into said computing device to said computing device through an interface (Figure 1, elements 50 and 70; column 2, lines 58-67; column 1, line 65 to column 2, line 10);
- determining whether or not resident software stored in a storage device associated with said computing device is authenticated (column 3, lines 40-65; Figure 2);
- determining whether or not said available software is authenticated (column
 4, line 6 to column 7, line 46);
- loading said available software into said storage device if said resident software has not been authenticated (column 3, lines 30-44; column 3, lines 38-40);

Art Unit: 2193

Shaw did not explicitly state setting an authentication flag if said resident software is not authenticated but said available software is authenticated. Shaw demonstrated that it was known at the time of invention to make use of flag indicators (column 3, lines 45-57; and column 4, line 45) and Shaw (as shown above) clearly demonstrates authenticating available code segments. It would have been obvious to one of ordinary skill in the art at the time of invention to implement the system of Shaw with a method of recording available code is authenticated (a flag) as found in Shaw's teaching. This implementation would have been obvious because one of ordinary skill in the art would be motivated to make use of a common method/device (flag) of communicating/recording information (in this case is or isn't code authenticated). This action occurs regardless of whether resident software is or is not authenticated.

Claim 4

Shaw disclosed the method of claim 3 wherein said authentication flag is set when said available software is determined to be authenticated (as above under claim 1).

Claims 9, 17 and 19

Claims 9, 17 and 19 correspond to claim 1 and as such are rejected in the same manner.

Application/Control Number: 09/698,526 Page 8

Art Unit: 2193

Claim 12

Apparatus claim 12 corresponds to method claim 1 and as such is rejected in the same manner.

5. Claims 7-8 and 15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Shaw** (USPN 6,381,741) in view of admitted prior art (herein referred to as **APA**).

Claims 7 and 8

Shaw disclosed the method of claim 6 (as discussed above). Shaw did not explicitly state: wherein said direct authentication procedure comprises performing a cyclic redundancy check; or wherein said direct authentication procedure comprises performing a secure hashing algorithm. APA demonstrated that it was known at the time of invention to utilize cyclic redundancy check, CRC (Specification, page 5, lines 24-35) and secure hashing algorithms, SHA (Specification, page 5, lines 24-35). It would have been obvious to one of ordinary skill in the art at the time of invention to incorporate the teachings of APA into the system and method of Shaw. This implementation would have been obvious because one of ordinary skill in the art would be motivated to perform well-known authentication techniques to determine when an update was necessary in order to improve the performance of a computing system.

Art Unit: 2193

Claims 15 and 16

Apparatus claims 15 and 16 correspond to method claims 7 and 8 and as such are rejected in the same manner.

Response to Arguments

Applicant's arguments filed 05 April 2005 have been fully considered but they are not persuasive. Applicant argues: **Shaw** does not disclose: ¹⁾ determining authenticity for available software; ²⁾ rejecting available software if said resident software is authenticated and available software is not authenticated; and ³⁾ setting and authentication flag if said resident software is not authenticated and said available software is authenticated. First, **Shaw** unambiguously discloses authenticating available software (column 5, lines 34-46). Second, it is clear from the above passage, non-authenticated available software is rejected and not used (it isn't trusted), this happens regardless of resident software's authentication status. Third, this is found in the above rejections and at least as indicated under the first point above. These issues are believed to clarify all of Applicant's concerns and as such the claims remain rejected under the cited prior art.

Art Unit: 2193

Correspondence Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William H. Wood whose telephone number is (571)-272-3736. The examiner can normally be reached 9:00am - 5:30pm Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kakali Chaki can be reached on (571)-272-3719. The fax phone numbers for the organization where this application or proceeding is assigned are (703)872-9306 for regular communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)305-3900.
